

18 March 2020

Dynaflow response to Coronavirus (COVID-19)

At Dynaflow, the wellbeing of our people, clients and the general community is of the utmost importance. To that end Dynaflow has enacted all measures recommended by the Australian Government - Department of Health and relevant state health agencies in relation to the COVID-19 outbreak.

Additionally, Dynaflow will be guided by preventative health measures implemented by our Clients on their sites.

As of Wednesday 18th March 2020, Dynaflow is operating on a business as usual basis and will continue to monitor relevant health authorities for the latest advice.

At this stage, Dynaflow anticipates there will be no interruptions to the supply and installation of Fume Cupboards and accessories. Our testing and maintenance scheduling will remain unchanged unless otherwise advised by our clients.

Dynaflow is presently working with suppliers to manage risks to the supply chain over the upcoming 6 month period, and is taking full precautions in relation to the health of Dynaflow personnel, to minimise and if possible eliminate disruptions to our delivery of equipment and services to all our clients.

If you have any queries please do not hesitate to contact us.

Yours Sincerely

Richard McNeall

Managing Director
