

## ENVIRONMENTAL PROTECTION POLICY DYNAFLOW PTY LTD

It is the policy of Dynaflow Pty Ltd to operate its business in a manner that protects the environment. The company recognises environmental protection as sound business practice that conserves resources, reduces potential liabilities and safeguards personnel, the neighborhood and the wider community. The company practices this policy in its manufacturing methods and in its choice of products which assist in the elimination of chemical fume effluent, the prevention of industrial injuries and the well being of end users.

To meet its overall policy objectives, Dynaflow Pty Ltd shall:

Ensure that Management and all personnel comply with the full intent of the laws and regulations relating to the environment.

Personnel will be encouraged to report to Management any deviation from these standards.

Although a low waste producing company, Dynaflow will follow work practices that prevent pollution and minimise its impact on the environment.

Conserve resources such as energy.

Ensure that all personnel are adequately trained in environmental requirements. Circulate and display prominently, its environmental policy

Involve all personnel in the decision making process through regular communication, consultation and training.

Identify and control all potential environmental hazards in the workplace through hazard identification and risk analysis.

Prevent accidents and incidents through planning and safe work practice.

Conserve energy in manufacturing. Design efficient and reliable products that minimise environmental impacts by using best available technology that will enable the end user to save energy and resources and actively reduce waste at worksites.
